One major example of the synergy of bioactive foods and extracts is their role as an antioxidant and the related remediation of cardiovascular disease. There is compelling evidence to suggest that oxidative stress is implicated in the physiology of several major cardiovascular diseases including heart failure and increased free radical formation and reduced antioxidant defences. Studies indicate bioactive foods reduce the incidence of these conditions, suggestive of a potential cardioprotective role of antioxidant nutrients. Bioactive Food as Dietary Interventions for Cardiovascular Disease investigates the role of foods, herbs and novel extracts in moderating the pathology

leading to cardiovascular disease. It reviews existing literature, and presents new hypotheses and conclusions on the effects of different bioactive components of the diet. Addresses the most positive results from dietary interventions using bioactive foods to impact cardiovascular disease Documents foods that can affect metabolic syndrome and other related conditions Convenient, efficient and effective source that allows readers to identify potential uses of compounds – or indicate those compounds whose use may be of little or no health benefit Associated information can be used to understand other diseases that share common etiological pathways

"An engaging narrative... a thorough, perceptive read... the book stands testament to good political writing and a wealth of information made alive through prose." --Publishers Weekly (STARRED) A tour de force of groundbreaking reportage by Pulitzer Prize-winning journalist Jo Becker, *Forcing the Spring* is the definitive account of five remarkable years in American civil rights history: when the United States experienced a tectonic shift on the issue of marriage equality. Beginning with the historical legal challenge of California's ban on same-sex marriage, Becker expands the scope to encompass all aspects of this momentous struggle, offering a gripping behind-the-scenes narrative told with the lightning pace of the greatest legal thrillers. For nearly five years, Becker was given free rein in the legal and political war rooms where the strategy of marriage equality was plotted. She takes us inside the remarkable campaign that rebranded a movement; into the Oval Office where the president and his advisors debated how to respond to a fast-changing political landscape; into the chambers of the federal judges who decided that today's bans on same-sex marriage were no more constitutional than the previous century's bans on interracial marriage; and into the mindsets of the Supreme Court judges who decided the California case and will likely soon decide the issue for the country at large. From the state-by state efforts to win marriage equality at the ballot box to the landmark Supreme Court case that struck down a law that banned legally married gay and lesbian couples from receiving federal benefits, Becker weaves together the political and legal forces that reshaped a nation. *Forcing the Spring* begins with California's controversial ballot initiative Proposition 8, which banned gay men and lesbians from marrying the person they loved. This electoral defeat galvanized an improbable alliance of opponents to the ban, with political operatives and Hollywood royalty enlisting attorneys Ted Olson and David Boies—the opposing counsels in the Supreme Court's *Bush v. Gore* case—to join together in a unique bipartisan challenge to the political status quo. Despite stiff initial opposition from the gay rights establishment, the case against Proposition 8 would ultimately force the issue of marriage equality all the way to the Supreme Court, transforming same-sex marriage from a partisan issue into a modern crisis of civil rights. Based on singular access to the internal workings of this momentous trial—and enlivened by original interviews with the participants on both sides of the case, many speaking for the first time—*Forcing the Spring* is at once an emotion-packed tale of love and determination as well as an eye-opening examination of an evidentiary record that federal courts across the nation are now relying on to strike down bans similar to California's. Shuttling between the twin American power centers of Hollywood and Washington—and based on access to all the key players in the Justice Department and the White House—Becker offers insider coverage on the true story of how President Obama “evolved” to embrace marriage equality, his surprising role in the Supreme Court battle, and the unexpected way the controversial issue played in the 2012 elections. What starts out as a tale of an epic legal battle grows into the story of the evolution of a country, a testament and old-fashioned storytelling to move public opinion. Becker shows how the country reexamined its opinions on same-sex marriage, an issue that raced along with a snowballing velocity which astounded veteran political operatives, as public opinion on same-sex marriage flipped and elected officials repositioned themselves to adjust to a dramatically changed environment. *Forcing the Spring* is the ringside account of this unprecedented change, the fastest shift in public o
