Dungeon Configuration Instructions (Quoted from Chocولاتin) Edit. All files inside config/Chocolate/DungeonConfig will be considered a dungeon (if the configuration is valid) and will be added to the spawning list. === To be considered valid the file requires the following parameters: === builder = builder_name. The builder parameter is extremely important. It defines the algorithm used to create the dungeon into the world.

David is now a dungeon core, charged with producing armies of minions and ensuring his domain is a place where the unworthy go to die. David knows all about working in a dead-end job. At least he thinks he does. After a freak accident in the barren wilderness of the Australian outback, he finds himself confronted with the true meaning of the term.

DungeonsXL is a server mod that allows you to instantiate worlds. Its main goal is to offer a way to use a world in a set state multiple times by a player (like for a jump'n'run), a group of players (e.g. for a quest dungeon, an adventure map or a PvE arena) or even by groups of groups of players (e.g. for PvP arenas).

config.prop. The Better Dungeons is a mod which adds new dungeons and mobs, bosses, and items to Hexxit. Conquering one of these dungeons is very rewarding as they hold chests filled with loot. However, there are monsters and traps in these dungeons, making them a challenge to complete. Most of the dungeons contain a boss, a significantly stronger mob within the dungeon which drops rare items.
