Comprehensive coverage of the time value of money In this book, authors Pamela Peterson Drake and Frank Fabozzi fully expand upon the type of time value of money (TVM) concepts usually presented as part of overviews given in other general finance books. Various TVM concepts and theories are discussed, with the authors offering many examples throughout each chapter that serve to reinforce the tools and techniques covered. Problems and detailed solutions-demonstrated using two different financial calculators, as well as Excel-are also provided at the end of each chapter, while glossary terms are provided in an appendix to familiarize you with basic terms. Provides the basic foundations of the time value of money Covers issues ranging from an introduction of financial mathematics to calculating present/future values and understanding loan amortization Contains problem/solution sets throughout, so you can test your knowledge of the topics discussed Understanding the time value of money is essential, and this reliable resource will help you gain a firm grasp of its many aspects and its real-world applications.

Ideal for college students in intermediate finance courses, this book uniquely applies mathematical formulas to teach the underpinnings of financial and lending decisions, covering common applications in real estate, capital budgeting, and commercial loans. • Lays the foundation of all the topics that are typically covered in a financial management textbook or class • Demonstrates how the mastery of a few basic concepts—such as the time value of money under all possible situations—allows for a precise understanding of more complex topics in finance • Describes how all advanced capital budgeting techniques can be reduced to the simplest technique—the payback period method • Examines traditional financial techniques using simple interest rate and accounting rate of return methods to conclusively show how these practices are now defunct

Completely up to date, the Study Guide gives you the additional practice and support you need to master text material and earn the grade you want. It outlines key chapter content and contains Self-Test Questions and Self-Test Problems to test your knowledge and application of text concepts. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.
