This is a realistic, believable and fast-paced novel. No meaningless deaths, no crazy killers, no unstoppable monsters, no alien spacecraft embedded in ice, no conspiracy theories. Not even any long lectures on the price we might pay for global warming, although it is called "a prophetic survival thriller."

Living in pre-Civil War  
Philadelphia, young Black  
activist Mifflin Gibbs was  
feeling disheartened from  
fighting the overwhelming  
tide of White America's  
legalized racism when  
abolitionist Julia Griffith

encouraged him to “go do some great thing.” These words helped inspire him to become a successful merchant in San Francisco, and then to seek a more just society in the new colony of Vancouver Island, where he was to become a prominent citizen and elected official. Gibbs joined a movement of Black American emigrants fleeing the increasingly oppressive and anti-Black Californian legal system in 1858. They hoped to establish themselves in a new country where they would have full access to the rights of citizenship and would be free to seek success and stability. Some

Six hundred Black Californians made the trip to Victoria in the midst of the Fraser River Gold Rush, but their hopes of finding a welcoming new home were ultimately disappointed. They were to encounter social segregation, disenfranchisement, limited employment opportunities and rampant discrimination. But in spite of the opposition and racism they faced, these pioneers played a pivotal role in the emerging province, establishing an all-Black militia unit to protect against American invasion, casting deciding votes in the 1860 election and helping to build the

province as teachers, miners, artisans, entrepreneurs and merchants. Crawford Kilian brings this vibrant period of British Columbia's history to life, evoking the chaos and opportunity of Victoria's gold rush boom and describing the fascinating lives of prominent Black pioneers and trailblazers, from Sylvia Stark and Saltspring Island's notable Stark family to lifeguard and special constable Joe Fortes, who taught a generation of Vancouverites to swim. Since its original publication in 1978, *Go Do Some Great Thing* has remained foundational

which harbor creative capacities, are depreciated by that brand of neoliberalism that confines self-organization to economic markets and equates the latter with impersonal rationality. Neoliberal practice thus fails to address the fragilities it exacerbates. Engaging a diverse range of thinkers, from Friedrich Hayek, Michel Foucault, Hesiod, and Immanuel Kant to Voltaire, Terrence Deacon, Friedrich Nietzsche, and Alfred North Whitehead, Connolly brings the sense of fragility alive as he rethinks the idea of freedom. Urging the Left not to abandon the state but to

The M/S Atlantica, the most advanced cruise ship in the world, is lost. Land has disappeared. Fuel, food and hope dwindle. After months recuperating in hospital, US Marine, Jack Cohen hoped a Caribbean cruise would help him recover from the horrific injuries he sustained fighting in the Middle East. Instead, when the ship is attacked, he is once again thrust into battle to protect Atlantica against the ruthless enemy hunting her, and the insidious threat already aboard. On these mysterious and uncharted seas, where

It all began when Engineer Harry Henderson was nearing the end of his eighteen month stint in Antarctica. Mapping petroleum deposits in the most hostile climate on Earth had become a mind-numbingly tedious job. After a difficult divorce, Harry took the assignment with Pinkerton Oil in an effort to get away from it all. Sixteen long months later, he was anxious to get back to civilization and restart his life. It was just another minus forty degree day outside of Camp

Beelzebub when Harry's assistant asked him to look at something peculiar on his computer screen. As Harry peered into the monitor used to identify geologic formations, he was shocked. The ground penetrating radar was displaying an image representing an object neither had encountered before. Further investigation identified the object as a large, perfectly rectangular, coffin shaped box made of an unknown metal - all things that would never occur in nature. The craziest part was that it was buried three hundred feet below the frozen soil under a mile of ancient ice!

When Harry reported his find to the powers at headquarters, there were more questions than answers. "Who had the ability to bury something that large, that deep? Even if they had the ability, why would they?" They asked. "Is the object solid or is it a container that holds some mysterious contents?" The Board of Pinkerton Oil's curiosity grew and eventually got the better of them. The decision was made. For better or worse they were going to dig down through the mile of ice and soil and bring whatever the hell that thing was to the surface! If you think you've seen this movie

**Thriller** before, you're wrong. If you're guessing the story is about a gigantic prehistoric monster devouring Tokyo, you are in for a huge surprise. Sci-Fi, mystery writer Tim Blagge has hit a home run with this cleverly written and completely unexpected tale of people being swept up to the heights of accomplishment only to be engulfed by the regret of bad choices and missed opportunities. Well crafted characters surround Harry Henderson as he finally discovers the unspeakable evil that has been unleashed on an unsuspecting world. Don't miss this intoxicatingly off-beat and

Drifting on a sailing boat off the Canary Islands, four British gentlemen take turns reading a manuscript that they find inside a copper cylinder discovered floating in the Atlantic Ocean. The manuscript recounts Adam More's adventures after being lost at sea during an Antarctic voyage in 1844 and his life with the Kosekin, a lost civilization living at the South Pole. The values of the Kosekin are opposed to the civilized norm—they love death, abjection, and

poverty. Their society may be well suited to their particular evolution, but it is profoundly disconcerting to the narrator, and it is radically contentious to the Victorian gentlemen who read and debate More's account. This Broadview edition of James De Mille's classic recreates the format of the posthumous 1888 Harper's Weekly serial, including 18 original illustrations by Gilbert Gaul. The appendices allow the novel to be seen in terms of other satirical and scientific romance, Antarctic exploration, and contemporary geology. The introduction and notes tap into recent scholarship to

Tracing the the potential of sound, infrasound, and ultrasound to access anomalous zones of transmission between the realms of the living and the dead. For as long as recording and communications technologies have existed, operators have evoked the potential of sound, infrasound, and ultrasound to access anomalous zones of transmission between the realms of the living and the dead. In Unsound:Undead, contributors from a variety

of disciplines chart these undead zones, mapping out a nonlinear timeline populated by sonic events stretching from the 8th century BC (the song of the Sirens), to 2013 (acoustic levitation), with a speculative extension into 2057 (the emergence of holographic and holosonic phenomena). For the past seven years the AUDINT group has been researching peripheral sonic perception (unsound) and the ways in which frequencies are utilized to modulate our understanding of presence/non-presence, entertainment/torture, and ultimately life/death. Concurrently, themes of

Hauntology have inflected the musical zeitgeist, resonating with the notion of a general cultural malaise and a reinvestment in traces of lost futures inhabiting the present. This undead culture has already spawned a Lazarus economy in which Tupac, ODB, and Eazy-E are digitally revived as laser-lit holograms. The obscure otherworldly dimensions of sound have also been explored in the sonic fictions produced by the likes of Drexciya, Sun Ra, and Underground Resistance, where hauntology is virtually extended: the future appears in the cracks of the present.
