The Starlight Xpress Lodestar X2 Autoguider is a popular guide camera for deep-sky astrophotography. In fact, the original Lodestar was considered to be the best autoguider on the market for a long time. The X2 version is the successor to the original Starlight Xpress Lodestar autoguider and uses a Sony ICX829 Exview sensor.

[Using a Starlight Xpress Lodestar X2 Autoguider for---](#)

Model: starlight_xpress_lodestar This model has been replaced by the new Lodestar X2. The Lodestar is a compact stand-alone USB2.0 guide camera featuring the large, sensitive Sony ICX429AL Exview CCD. Suitable for most mounts with a standard autoguider input.

[Starlight Xpress Lodestar Autoguider | First Light Optics](#)

Lodestar X2 now takes the lead as the best autoguider on the market. With faster download times and even lower read nose figures, finding a faint guide star has never been so easy.

[Starlight Xpress Lodestar X2 Autoguider | First Light Optics](#)

Product information The Lodestar X2 is the latest and most sensitive compact guide camera from Starlight Xpress - the successor to the standard Lodestar. It offers twice the sensitivity of the original Lodestar (hence X2 designation) making guide stars even easier to find. Autoguider output socket has been changed to an RJ12 connector.

[Starlight Xpress Lodestar X2 Autoguider - Altair Astro](#)

The World's favourite autoguider is now even better! With its new Sony ICX829 Exview2 CCD, it offers twice the sensitivity of the original Lodestar, making guide stars even easier to find. In addition, the autoguider output socket is now a standard RJ12 connector and so overcomes any objections to the strength of the original Lodestar cable.
