Surveillance Station User's Guide - Synology

At its most basic, a surveillance system is a camera, a monitor, and a wire running between them. This kind of system is also called a "closed circuit television" system, abbreviated CCTV. This allows you to observe an area remotely, without actually having to be there in person. What if you want to observe multiple areas?

Surveillance Equipment Buying Guide | B&H Explora

As you know cameras are the main component of your surveillance system, but the heart of a surveillance system is the DVR, which records live video feed and gives the ability to play recorded video anytime when you want. DVR uses a hard drive to store the videos coming from cameras. DVR is used for analog security cameras systems.
