One of the major features of Jython is its ability to use the Swing GUI library in JDK. The Standard Python distribution (often called as CPython) has the Tkinter GUI library shipped with it. Other GUI libraries like PyQt and WxPython are also available for use with it, but the swing library offers a platform independent GUI toolkit. Using the swing library in Jython is much easier compared to using it in Java.

Chapter 16: GUI Applications¶ The C implementation of Python comes with Tcl/Tk for writing Graphical User Interfaces (GUIs). On Jython, the GUI toolkit that you get automatically is Swing, which comes with the Java Platform. Like CPython, there are other toolkits available for writing GUIs in Jython.

**Chapter 16: GUI Applications** - Definitive Guide to Jython...

One of the major features of Jython is its ability to use the Swing GUI library in JDK. The Standard Python distribution (often called as CPython) has the Tkinter GUI library shipped with it. Other GUI libraries like PyQt and WxPython are also available for use with it, but the swing library offers a platform independent GUI toolkit. Using the swing library in Jython is much easier compared to using it in Java.

**Jython** - Quick Guide - Tutorialspoint

Hi guys, does anyone have any experience using Jython embedded in a Java GUI application (i.e. Swing or AWT) and using python scripts to extend the user interface? E.g. building a core GUI using Swing, then, using Jython embedded, building extra GUI elements like dialogs and trees etc.

**Jython and Java GUI** - Java

The GUI description format lets you enter essential information about the GUI (such as the structure of the GUI, labels of buttons, and callback methods) with a minimum amount of typing. At the same time, it is fairly general because the extra option lets you define arbitrary widget properties, taking advantage of Jython's ability to pass JavaBean properties to class constructors as keyword ...

**Swing for Jython: Graphical Jython UI and Scripts**...

Jython would be it. It is as simple as import javax.swing f =3D javax.swing.JFrame() f.getContentPane().add( javax.swing.JLabel( "Hello World" ) ) f.setVisible( 1 ) | surveyed Jython, PyJava, JPE and JPL. Jython sounds great but I only I needs Swing as my GUI and the whole Jython is based on Java, speed I will be a issue.

**Mailing List Archive: Python GUI with Swing**

Standard builds of Python include an object-oriented interface to the Tcl/Tk widget set, called tkinter. This is probably the easiest to install (since it comes included with most binary distributions of Python) and use. For more info about Tk, including pointers to the source, see the Tcl/Tk home page.
